Construction SOW for academic year September 2024-July 2025 Term 1 Term 2 Lesson Term 3 Lesson Term 4 Lesson Term 5 Lessor Term 6 Lessor Lesson **Carpentry Trade skills** Wet Trade skills **Electrical Trade skills** Plumbing Trade skills Application of Construction Knowledge Class Introduction to Construction Introduction to constrution - To get to know lealth and Safety - To understand health and Health and Safety - To understand health and Health and Safety - To understand health and Health and Safety - To identify risks and Health and Safety - To identify risks and each other and understand the course and safety relating to electricity and know the safety for carpentry safety for brick work hazards relating to plumbing hazards relating to construction how to complete it successfully Workshop rules and PPE - To understand the Trade hand tools training and skills - To Trade hand tools training and skills - To Electrical handtools and materials - To identify Electrical /plumbing handtools and materials To identify and use correctly hand tools to Portfoilo finalisation - To produce a portfolio of rules of the workshop and identify what PPE identify and use correctly hand tools to identify and use correctly hand tools to and use correctly hand tools to complete is required complete tasks complete tasks complete tasks Health and Safety within plumbing industry - To demonstrate knowledge of COSHH and Health and Safety with electrical insulations Health and safety introduction - To produce a Measurments and marking - To know the Measurments and setting out - To understand Portfoilo finalisation - To produce a portfolio of portfolio of evidence relating to Health and To articulate the wiring regulations and wiring process of marking out and the tools used the setting out process how this affects plumbing tasks Assessment checks and expanision - To Measurments and Marking - To identify and Measurments and marking - To identify and Introduction to construction course content Cutting and pairing - To identify hand tools Tunning in and pointing - To identify hand apply knowledge and understanding of E3 To navigate the construction course portfolio and use them to complete tasks tools and use them to complete tasks use correctly hand tools to complete tasks use correctly hand tools to complete tasks 9 Trade hand tools training and Trade hand tools training and Carpentry hand tools training - To identify and Trade hand tools training and Trade hand tools training and Assessment checks and expanision - To Post ' skills/assessments - To demonstrate skills/assessments - To demonstrate use appropriately hand tools to complete skills/assessments - To demonstrate ability to skills/assessments - To demonstrate apply knowledge and understanding of understanding and use correctly trade hand understanding and use correctly trade hand use hand tools correctly understanding of trade hand tools construction Assessment paperwork and processes - To Assessment processes and appeals - To Assessment paperwork and processes - To Assessment paperwork and processes - To Assessment paperwork and processes - To understand the assessment process and the apply knowledge and understanding of apply knowledge and understanding of brick apply knowledge and understanding of apply knowledge and understanding of appeals procedure woodwork working with electrics Assessment and IQA/EQA processes Assessment paperwork and processes - To explained - To understand the IQA/EQA apply knowledge and understanding of assessment process Term 2 Term 3 Term 4 Term 5 Term 6 Lesson Term 1 Lesson Lesson Lesson Lesson Lesson Introduction Carpentry Trade skills Wet Trade skills Flectrical Trade skills Plumbing Trade skills Trade skills Class Introduction to constrution - To get to know lealth and Safety - To understand health and Health and Safety - To understand health and lealth and Safety - To understand health and Health and Safety - To identify risks and Health and Safety - To identify risks and safety relating to electricity and know the each other and understand the course and safety for carpentry safety for brick work hazards relating to plumbing hazards relating to construction how to complete it successfully regulations Workshop rules and PPE - To understand the Trade hand tools training and skills - To Trade hand tools training and skills - To Electrical handtools and materials - To identify Electrical /plumbing handtools and materials -Portfoilo finalisation - To produce a portfolio of and use correctly hand tools to complete rules of the workshop and identify what PPE identify and use correctly hand tools to identify and use correctly hand tools to To identify and use correctly hand tools to evidence from knowledge and skills learnt is required complete tasks complete tasks tasks complete tasks throughout the course Portfoilo finalisation - To produce a portfolio of Health and safety introduction - To produce a Health and Safety with electrical insulations -Health and Safety within plumbing industry -Measurments and marking - To know the Measurments and setting out - To understand evidence from knowledge and skills learnt cert portfolio of evidence relating to Health and To demonstrate knowledge of COSHH and To articulate the wiring regulations and wiring process of marking out and the tools used the setting out process Safety how this affects plumbing tasks throughout the course level 1 Assessment checks and expanision - To Introduction to construction course content -Cutting and pairing - To identify hand tools Running in and pointing - To identify hand Measurments and marking - To identify and Measurments and marking - To identify and apply knowledge and understanding of To navigate the construction course, portfolio and use them to complete tasks tools and use them to complete tasks. use correctly hand tools to complete tasks. use correctly hand tools to complete tasks construction Post 16 I Trade hand tools training and Trade hand tools training and Carpentry hand tools training - To identify and Trade hand tools training and Trade hand tools training and Assessment checks and expanision - To skills/assessments - To demonstrate skills/assessments - To demonstrate skills/assessments - To demonstrate ability to skills/assessments - To demonstrate use appropriately hand tools to complete apply knowledge and understanding of understanding and use correctly trade hand understanding and use correctly trade hand use hand tools correctly understanding of trade hand tools construction Assessment processes and appeals - To Assessment paperwork and processes - To apply knowledge and understanding of apply knowledge and understanding of brick apply knowledge and understanding of apply knowledge and understanding of understand the assessment process and the appeals procedure work working with electrics plumbing Assessment paperwork and processes - To Assessment processes explained - To apply knowledge and understanding of understand the IQA assessment process woodwork Lessor Term 1 Term 2 Lessor Term 3 Term 4 Term 5 Term 6 Electrical Trade Skills Introduction - Flectrical Electrical Trade Skills **Electrical Trade Skills Electrical Trade Skills Electrical Trade Skills** Class Introduction to constrution - To get to know Health and Safety - To understand health and each other and understand the course and safety whilst undertaking electrical skills how to complete it successfully Workshop rules and PPE - To understand the Electricians tooling and materials - To Portfoilo finalisation - To produce a portfolio of Electrical rules of the workshop and identify what PPE understand the tools and materials used when monstrate safe tool useage and understand monstrate safe tool useage and understand demonstrate safe tool useage and understand evidence from knowledge and skills learnt working with electrics throughout the course the regulations the regulations the regulations is required Health and safety introduction - To produce a Flex, Twin and Earth regulations - To Flex, Twin and Earth regulations - To apply Portfoilo finalisation - To produce a portfolio of Flex, Twin and Earth - To understand the Flex, Twin and Earth - To understand the portfolio of evidence relating to Health and consolidate understanding and know the understanding and know the differences evidence from knowledge and skills learnt throughout the course differences between flex and cables differences between flex and cables differences between flex and cables Safety between flex and cables Cert Niring ceiling rose and one way lighting - To Assessment checks and expanision - To Plug wiring and ceiling rose - To develop Wiring ceiling rose and one way lighting - To Introduction to construction course content develop further skills and understanding of Wiring a final ring main - To understand the practical skills and apply the correct tools and develop practical skills and understand the apply knowledge and understanding of level 1 wiring processes and the regulations involved To navigate the construction course portfolio the wiring process and the regulations wiring process and the regulations involved construction Plug wiring and ceiling rose - To develop practical skills and apply the correct tools and Electric hand tools training - To identify and Wiring ceiling rose and one way lighting - To Assessment checks and expanision - To Conduit protection systems - To understand Wiring a final ring main - To understand the use appropriately hand tools to complete develop practical skills and understand the apply knowledge and understanding of Post 16 I the wiring protection systems wiring processes and the regulations involved construction wiring process and the regulations involved Assessment processes and appeals - To understand the assessment process and the understand the assessment process understand the assessment process understand the assessment process understand the assessment process appeals procedure Assessment processes explained - To Assessment processes explained - To understand the IQA assessment process understand the IQA assessment process Lessor Term 1 Term 2 Term 3 Lesson Term 4 Lesson Term 5 Lesson Term 6

Plumbing Trade Skills

Plumbing Trade Skills

Plumbing Trade Skills

Plumbing Trade Skills

Introduction - Plumbing

Class

Plumbing Trade Skills

	1	Introduction to constrution - To get to know each other and understand the course and how to complete it successfully	1	Health and Safety - To understand health and safety whilst undertaking plumbing	1	Health and Safety - To understand health and safety whilst undertaking plumbing		Health and Safety - To understand health and safety whilst undertaking plumbing		Health and Safety - To understand health and safety whilst undertaking plumbing		Health and Safety - To understand health and safety whilst undertaking plumbing
Post 16 level 1 Cert Plumbing	2	Workshop rules and PPE - To understand the rules of the workshop and identify what PPE is required	2	Plumbing hand tools - To understand the tools and materials used when plumbing	2	Plumbing hand tools - To develop further skills using the tools and materials used when plumbing	2	Plumbing hand tools - To develop further skills using the tools and materials used when plumbing	2	Plumbing hand tools - To develop further skills using the tools and materials used when plumbing	2	Plumbing hand tools - To develop further skills using the tools and materials used when plumbing
	3	Health and safety introduction - To produce a portfolio of evidence relating to Health and Safety	3	Measurments and marking - To know the process of measuring and marking out and the tools used	3	Measurments and marking - To develop the process of marking out and the tools used	3	Measurments and marking - To develop further the process of marking out and the tools used	3	Measurments and marking - To develop further the process of marking out and the tools used	3	Fitting Rainwater Goods - To fit rainwater goods successfully
	4	Introduction to construction course content - To navigate the construction course portfolio	4	Cutting and Jointing - To develop skills in cutting and jointing copper using capilary fittings	4	Radiators - To remove and refit a radiator	4	Copper Pipe Skills - To cut, join and bend copper piping	4	Sink Fitting - To correctly fit a sink	4	Fitting Rainwater Goods - To fit rainwater goods successfully
	5	Introduction to plumbing hand tools and training - To identify and use appropriately hand tools to complete tasks	5	Plumbing hand tools training and assessment - To develop skills using plumbing hand tools	5	Plumbing hand tools training and assessment - To develop skills using plumbing hand tools	5	Plumbing hand tools training and assessment - To develop skills using plumbing hand tools	5	Plumbing hand tools assessment - To develop skills using plumbing hand tools	5	Plumbing hand tools training and assessment - To develop skills using plumbing hand tools
	6	Assessment processes and appeals - To understand the assessment process and the appeals procedure	6	Assessment processes and appeals - To understand the assessment process	6	Assessment processes and appeals - To understand the assessment process and complete portfolio	6	Assessment processes and appeals - To understand the assessment process and complete portfolio	6	Assessment processes and appeals - To understand the assessment process and complete portfolio	6	Assessment processes and appeals - To understand the assessment process and complete portfolio
	7	Assessment processes explained - To understand the IQA assessment process	7	Assessment processes explained - To understand the IQA assessment process	7		7		7		7
